Great coffee, service, wifi, papers, ipad and I could go on. No wonder there isn't a negative review in sight about this place.

It's obvious these guys not only care about serving great coffee they also value their customers and it shows.

Worth going out of your way to visit and adding to the list of Perth's best coffees.

Service

It's obvious these guys care about serving up quality coffee with service to match.

5senses as always hits the spot and with great latte art thrown in for good measure txt shots one to add to my list of Perth's best coffees. Lovely goodies on display in the cabinet too.

The staff are welcoming, tables are cleared and a good supply of newsprint and free wifi is on tap. Did I mention the iPad which you can browse while you sip? Brilliant idea.

I think it's fast becoming one of Perth's worst kept secrets too judging by the steady steam of regulars. Worth going out of your way to experience.
